FACILITIES FOR PHYSICALLY CHALLENGED INDIVIDUALS

Introduction

SEICOM Degree College is committed to fostering an inclusive educational environment. As part of this commitment, essential facilities have been made available to support students and visitors with physical challenges. This report outlines the key infrastructure and services currently in place, reflecting the institution's ongoing efforts toward accessibility and inclusivity.

1. Ramp Access to Buildings

To facilitate easy mobility, SEICOM has installed ramps at the main entrances of key buildings. These ramps are designed to assist wheelchair users and those with limited mobility, ensuring smooth access to classrooms and administrative offices. Ramps are built according to accessibility standards with non-slip surfaces.

2. Accessible Toilets

Dedicated toilets for physically challenged individuals are available on campus. These restrooms are equipped with handrails, low sinks, and are spacious enough to accommodate wheelchairs, offering safety and privacy. Signage for these facilities is clearly visible.

3. Ground Floor Classrooms

Most classes for physically challenged students are conducted in rooms located on the ground floor. This eliminates the need for stairs and simplifies access to academic sessions. Additionally, classrooms are regularly reviewed for accessibility compliance.

4. Wide Pathways

The campus features broad, leveled pathways that make movement across the premises easier for wheelchair users and those with walking aids. These paths are kept clear, well-lit, and maintained regularly. Tactile paving is being considered for future development.

6. Support Staff Assistance

Trained support staff are available on campus to assist physically challenged individuals when needed. They help in mobility, accessing facilities, and emergency evacuations if necessary.

Conclusion

While SEICOM continues to develop its infrastructure, the facilities currently in place provide essential support to physically challenged individuals. These measures reflect the institution's commitment to creating a welcoming and accessible academic environment. Future improvements will aim to further enhance accessibility and ensure that all students can participate fully in college life.
