WATER CONSERVATION POLICY

1. Introduction

The SEICOM Degree College acknowledges the critical importance of water as a finite resource. This Water Conservation Policy aims to promote efficient water use, reduce wastage, and encourage sustainable practices within the college community.

2. Objectives

- To promote awareness of water conservation practices among students, faculty, and staff.
- To implement sustainable water management practices on campus.

3. Scope

This policy applies to all college facilities, including classrooms, laboratories, libraries, hostels, and outdoor areas.

4. Water Conservation Strategies

4.1 Water Audits

- Conduct regular water audits to assess consumption patterns and identify areas for improvement.
- Implement recommendations from audits to enhance water efficiency.

4.2 Efficient Fixtures

- Install water-saving fixtures, such as low-flow faucets, showerheads, and dual-flush toilets in all facilities.
- Regularly maintain and repair plumbing systems to prevent leaks and wastage.

4.3 Irrigation Practices

- Use drip irrigation and other efficient watering techniques for landscaping and gardens.
- Schedule irrigation during cooler parts of the day to minimize evaporation.

4.4 Education and Awareness

- Organize workshops and campaigns to educate the college community about water conservation practices.
- Integrate water conservation topics into the curriculum to foster a culture of sustainability.

5. Monitoring and Reporting

- Establish a Water Conservation Committee to oversee implementation and monitor progress.
- Prepare an annual report detailing water usage, conservation efforts, and progress toward objectives.

6. Compliance

- All members of the college community are expected to adhere to this policy.
- Non-compliance may result in disciplinary measures as per college regulations.

7. Review of Policy

This policy will be reviewed annually to ensure its effectiveness and relevance in promoting water conservation.

8. Action Plan

- College should visually inspect all the water conservation system in the campus periodically. It ensures primarily on the regular monitoring of quality of drinking water, maintenance of water distribution system and effective utilization of the waste water.
- The water demand, wastage of water and the quantity of the water in the reservoirs should be quantified periodically.
- The standard operating procedures should be developed and documented.

8. Conclusion

The SEICOM Degree College is committed to sustainable water management and conservation. Through the implementation of this policy, we aim to safeguard this precious resource and promote responsible water use within our community.
